

Månadsrapport för Aquantum Pegasus (Quampo™ SEK)

Kortfattad strategibeskrivning

Strategin relaterar till en marknadsneutral allokeringstrategi (Aquantum Pegasus Strategy) som utnyttjar några av råvarumarknadens speciella marknadsfaktorer. Allokeringstrategin utnyttjar skillnader i tillgång och efterfrågan, skillnader mellan terminspris och pris på den fysiska råvaran, samt likviditetspremium (skillnad i pris på terminskontrakt med olika löptid) på 24 olika råvarumarknader.

För att omvandla strategins avkastning från amerikanska dollar till svenska kronor används en valutaomvandlingsteknologi (Quampo™). Teknologin utnyttjar rullande valutaterminer på månadsbasis, liknande det som fonder gör för att konvertera t ex en utländsk fond till svenska kronor.

För att stabilisera volatiliteten så justerar strategin dynamiskt sin totala exponering beroende på hur den realiserade volatiliteten utvecklats. Den totala exponeringen mot strategin ökar (upp till maximalt 145%) när dess realiserade volatilitet minskar. I motsatt riktning så faller den totala exponeringen när strategins realiserade volatilitet ökar.

Strategidata

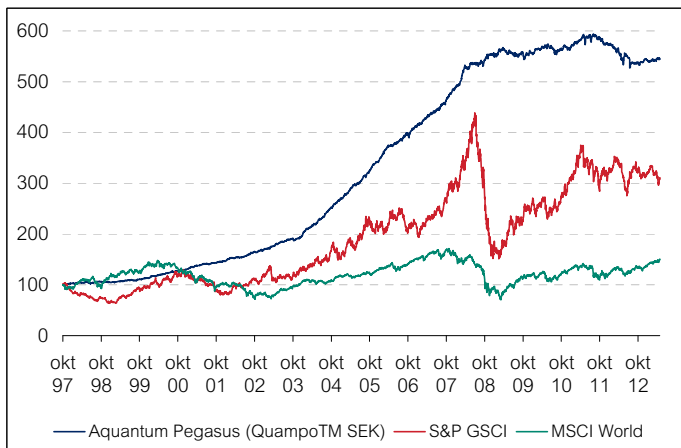

Namn	Risk Stabilised Aquantum Pegasus Strategy (Quampo™ SEK)
Basdatum	6 oktober 1997
Lanseringsdatum	8 juli 2008
Bloomberg Ticker	RBSAQPK1 Index <GO>
Beräkningsagent	Future Value Consultants (FVC) Ltd
Valuta	SEK

Viktig information om denna rapport och dess innehåll

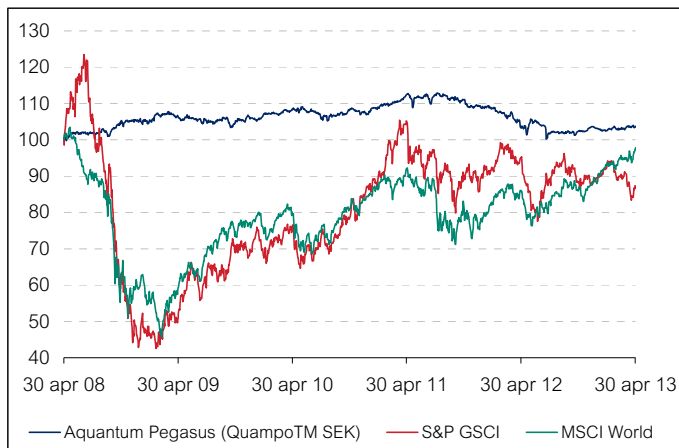

All historisk information avseende tid före Lanseringsdatum är simulerad. Simulerad information är baserad på egna beräkningsmodeller, data och antaganden och en person som använder andra modeller, data eller antaganden kan nå andra resultat. Varken faktisk eller simulerad historisk utveckling är en garanti för eller indikation om framtida utveckling. Basdatum innebär det datum från vilket simulerad strategiutveckling beräknats.
